Plan 360

Plan Summary | Base Facts

The Plan Summary report lists high-level facts about a single plan, scenario, or Base Facts.

Probability of Success	75%	Confidence Age	— / 93	Age Assets Last Until	— / 95
------------------------	-----	----------------	--------	-----------------------	--------

Probability of Success

Longevity Risk - Probability of Success

Asset Spread - Total Portfolio Assets

Net Worth Summary

Total Assets	\$1,597,657
Total Liabilities	(\$89,000)
Total Net Worth	\$1,508,657
Out of Estate	—

Net Worth History

Assets by Tax Type

Lifetime Portfolio Value

Cash Flow Overview

Income Taxes

This analysis must be reviewed in conjunction with the limitations and conditions disclosed in the Disclaimer page. Projections are based on assumptions provided by the advisor/representative, and are not guaranteed. Actual results will vary, perhaps to a significant degree. The projected reports are hypothetical in nature and for illustrative purposes only. Return assumptions do not reflect the deduction of any commissions. They will reflect any fees or product charges when entered by the advisor/representative. Deduction of such charges would result in a lower rate of return. Consult your legal and/or tax advisor before implementing any tax or legal strategies.

Net Worth Statement | As of July 18, 2026

Monte Carlo Summary | Base Facts (Only Show Future Values)

This Monte Carlo Analysis runs multiple simulations of your financial plan against future market conditions. The result of introducing random investment volatility to the analysis produces a range of values that demonstrates how changing investment markets may impact your future plans.

Probability Of Success

Low (0% - 69%) Medium (70% - 81%) High (82% - 100%)

Portfolio Assets

-- Desired Remainder: \$150,000

Market Conditions	Percentile	Portfolio Assets
Above Average	90%	\$3,677,159
Median	50%	\$946,285
Below Average	10%	(\$372,765)

This Monte Carlo analysis illustrates the potential results of your financial plan using up to 1000 randomly generated market returns and volatility called trial runs. In each trial run, the mean and standard deviation of a selected benchmark index for each account or portfolio is used for a randomly chosen year. This hypothetical investment performance is combined with the detailed cash flow and tax calculations for your plan. The trial runs produce a range of potential results and are one way of illustrating and evaluating the statistical probability of your planning strategies.

IMPORTANT: The projections generated by this Monte Carlo simulation regarding the likelihood of various investment outcomes do not reflect or guarantee future results and may vary with each use and over time. Calculations are based upon market index and growth rate assumptions in your plan. Refer to the Assumptions Summary and Monte Carlo Assumptions reports for details.

This analysis must be reviewed in conjunction with the limitations and conditions disclosed in the Disclaimer page. Projections are based on assumptions provided by the advisor/representative, and are not guaranteed. Actual results will vary, perhaps to a significant degree. The projected reports are hypothetical in nature and for illustrative purposes only. Return assumptions do not reflect the deduction of any commissions. They will reflect any fees or product charges when entered by the advisor/representative. Deduction of such charges would result in a lower rate of return. Consult your legal and/or tax advisor before implementing any tax or legal strategies.

This table presents the estimated monthly interest and dividend income and return of principal that your current holdings may generate over the next rolling 12 months. The cash flows displayed are estimates provided for informational purposes only and there is no guarantee that you will actually receive any of the amounts displayed. These estimates should not be relied upon for making investment, trading or tax decisions. The estimates for fixed income are calculated using the security's coupon rate. The estimates for all other securities are calculated using an indicated annual dividend (IAD). The IAD is an estimate of a security's dividend payments for the next 12 months calculated based on prior and/or declared dividends for that security. IADs are sourced from third party

Portfolio & Allocation:

By Individual Account

Balanced Growth Portfolio

The Rebalance Balanced Growth Portfolio is invested 60% in stocks and 40% in bonds and is constructed for an investor who may be newly retired or in their late career years, is tolerant of stock market ups and downs, may be withdrawing funds over next 20 years, and wants a balanced blend of growth and income-oriented investments.

This portfolio consists of eight exchange-traded funds (ETFs) that hold 4,160 stocks of large, mid-sized, and small U.S. public companies and 10,181 stocks of large, mid-sized and small public companies in 45 foreign countries, and 17,324 bonds issued by governments and corporations worldwide. The portfolio is constructed to capture the long-term returns of the global economy in its globally diversified growth investments, combine higher-quality fixed income with some credit-risk-oriented securities in its income investments and provide a balance in sources of potential return with a tilt toward growth.

The ETFs were carefully selected as discrete building blocks to accomplish a highly sophisticated asset allocation strategy. Superior low-cost funds from the largest most experienced index providers (such as Vanguard, Schwab, and BlackRock) have been carefully vetted by the Rebalance Investment Committee. ETF fund fees for this portfolio equal a weighted average of 0.04%, as much as 80% cheaper than the cost of an actively managed mutual fund portfolio.

The Balanced Growth Portfolio periodically is rebalanced based upon a sophisticated algorithm that considers individual ETFs, asset classes, and fixed-income-to-equity targets.

INCOME FUNDS	# Securities	The Fund Contains:
U.S. Bonds – Broad	13,175	U.S. bonds including Treasuries, corporates and mortgage-backed bonds guaranteed by the U.S. government.
U.S. Bonds – Corporate	2,244	Bonds backed by the largest and most stable U.S. corporations including Bank of America, Meta, Pfizer, and JPMorgan Chase.
U.S. Bonds – High Yield	1,905	Bonds of U.S. corporations paying greater interest to borrow. Issuers include CCO Holdings, Transdigm, Tenet Healthcare, and Venture Global LNG.

GROWTH FUNDS	# Securities	The Fund Contains:
U.S. Stocks	3,511	Nearly all publicly traded U.S. companies, weighted toward the largest, such as Microsoft, Apple, Amazon, Nvidia, and Alphabet (Google).
U.S. Stocks – Small	649	Small U.S. companies like Solstice Advanced Materials, Interdigital, Moog, and Caretrust REIT.
European & Asian Stocks	3,893	All major public companies in Europe and Asia, including Japan, UK, Europe, South Korea, and Canada.
Emerging Market Stocks	6,288	All major public companies in China, Taiwan, Hong Kong, India and Brazil such as Taiwan Semiconductor Manufacturing, Tencent, Alibaba, and HDFC Bank.
U.S. Stocks – Real Estate	148	Real estate investment trusts (REITs) that purchase retail malls, apartments, offices, hotels, and warehouses. Portfolio REITs include Welltower, Prologis, American Tower, and Equinix.

Disclaimers

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal of an investment will fluctuate, therefore, shares may be worth more or less than the original cost when redeemed. Market values do not include any tax consequences that may be due. Calculations based on and valuations stated in US Dollars.

These reports are not to be construed as an offer or the solicitation of an offer to buy or sell securities mentioned herein. Information contained in these reports is based on a variety of sources and data believed reliable, but its accuracy cannot be guaranteed. Reports are for informational purposes only. These reports do not take the place of any brokerage statements, any fund company statements, or the 1099 tax forms. Differences in positions may occur due to reporting dates used and whether certain assets are not maintained by your custodian.

There may also be differences in the investment values shown due to the use of differing valuation sources and methods. You are urged to compare the information contained in this statement to the information contained in the statement you receive from the custodian of your account. Comparing statements will allow you to determine whether account transactions, including deductions to pay advisory fees, are proper. In the event that there is a discrepancy between this document and the statements you receive, the statement from the custodian takes precedence.

Please inform your financial advisor if you are not receiving monthly custodial statements (accounts with no activity may receive quarterly statements).

Current yield represents only the interest or dividend paid by the product. Yield estimates are not guaranteed and are subject to change based on market conditions.

Investing in fixed income securities involves special risks not typically associated with equity securities. These risks include credit risk, which is the risk of potential loss due to the inability to meet contractual debt obligations, and interest risk, which is the risk that an investment's value will change due to a change in the level of interest rates. Additionally, there is an inverse relationship between bond prices and interest rates specific to fixed income

securities. As interest rates rise, bond prices fall and, conversely, as interest rates fall, bond prices rise.

Higher-yielding/lower-rated corporate bonds, more commonly known as junk bonds, have a greater risk of price fluctuation and loss of principal and income than U.S. government securities such as U.S. treasury bonds and bills, which offer a government guarantee of repayment of principal and interest if held to maturity.

Investing in micro, small or mid-sized companies involves risks not associated with investing in more established companies. Since equity securities of small companies may not be traded as often as equity securities of larger, more established companies, it may be difficult or impossible for the fund to sell.

International investing presents certain risks not associated with investing solely in the United States. These include, for instance, risks relating to fluctuations in the value of the US dollar relative to the values of other currencies, custody arrangements made for foreign holdings, political risks, differences in accounting procedures and the lesser degree of public information required to be provided by non-US companies.

Investing in a single-region or single-sector fund involves greater risk than investing in a more diversified fund.

Investing in securities in emerging markets involves special risks due to specific factors such as increased volatility, currency fluctuations and differences in auditing and other financial standards. Securities in emerging markets are volatile and can decline significantly in response to adverse issues, political, regulatory, market or economic developments.

Changes in real estate values or economic downturns can have a significant negative effect on issues in the real estate industry. An investment cannot be made directly into an index.

Rebalance Plan 360 Disclaimer

The Rebalance Plan 360 is a diagnostic tool intended to review your current financial situation and suggest potential planning ideas and concepts that may be of benefit. The purpose of the report is to illustrate how accepted financial and estate planning principles may improve your current situation.

This report is based upon information and assumptions provided by you (the client). This report provides broad and general guidelines on the advantages of certain financial planning concepts and does not constitute a recommendation of any particular technique. The consolidated report is provided for informational purposes as a courtesy to you. We recommend that you review your plan annually, unless changes in your personal or financial circumstances require more frequent review. All reports should be reviewed, including this Disclaimer page.

The term "plan" or "planning," when used within this report, does not imply that a recommendation has been made to implement one or more financial plans or make a particular investment. Nor does the plan or report provide legal, accounting, financial, tax or other advice. Rather, the report and the illustrations therein provide a summary of certain potential financial strategies. The reports provide projections based on various assumptions and are therefore hypothetical in nature and not guarantees of investment returns. You should consult your tax and/or legal advisors before implementing any transactions and/or strategies concerning your finances.

Additionally, this report may not reflect all holdings or transactions, their costs, or proceeds received by you. It may contain information on assets that are not held at Rebalance. As such, those assets are represented based on how you (client) have disclosed them. Prices that may be indicated in this report are obtained from sources we consider

reliable but are not guaranteed. Past performance is no guarantee of future performance and it is important to realize that actual results may differ from the projections contained in this report. For financial assets not managed by Rebalance, the presentation of investment returns set forth in this report does not reflect the potential deduction of any commissions, fees, or surrender charges on products you might own. Deduction of such charges will result in a lower rate of return.

It is important to compare the information on this report with the statements you receive from the custodian(s) for your account(s). Please note that there may be minor variations due to calculation methodologies. If you have any questions, please contact your financial adviser.

Specific client financial plans and their implementation are dependent upon the client's current situation (income, tax levels, and risk tolerance levels). Rebalance constructs a client-specific plan to aid in the selection of a portfolio that matches restrictions, needs, and targets of the client. The written financial plan is designed from the personal information and documents furnished to Rebalance by the client and it is based on the client's expression of personal investment objectives. It is essential that tax and legal planning be undertaken only with the advice of the client's attorney, CPA, and other financial advisors. It is advised that the plan is updated on a regular basis. The written financial plan is not to be construed as offering legal or accounting advice. Clients are encouraged to discuss the financial plan prepared by Rebalance with their attorneys and accountants.
